SKILLS SUMMARY

- **Languages**:   JAVA, JavaScript, SOLIDITY
- **Frameworks**:   Express (NodeJs), Tailwind, Hardhat
- **Library**:   EtherJs, React,
- **Tools**:   GIT, POSTMAN
- **Platforms**:   Web, Windows
- **CourseWork**:   OOP, Operating System, DBMS, CN
- **Soft Skills**:   Leadership, Event Management, Writing, Public Speaking, Time Management

PROJECTS

- **GitHub Searcher (React + Firebase Auth)**: FireHub is a GitHub profile and repository search application that is built using React, React-Router-Dom, and Firebase Authenticationto secure the app . The app allows users to search for GitHub profiles and repositories and view detailed information about the profile using official API. (June '22)

- **MERN-Recipe (MERN)**: I have created a recipe creation application using the MERN stack, which includes MongoDB, Express.js, React.js, and Node.js. This application enables users to perform all CRUD operations. I built this application by referring to various documentation sources and YouTube tutorials to ensure that I had a understanding of each technology. (March '23)   GitHub: 'Link'

- **Crowd Funding Marketplace On Ethereum (Next Js, Hardhat, Solidity)**: (Work in progress) Crowdfunding marketplace on Ethereum using Next.js, Hardhat, and Solidity. I developed smart contracts for crowdfunding campaigns and created a user interface with Next.js. To ensure security and reliability, I used Hardhat as the development environment and testing framework. This project gave me experience in decentralized application development and popular blockchain tools. (May '23)   GitHub: 'Link'

ACCOMPLISHMENTS
